Mobile Device Management (MDM) Feature Spotlight

Enable your entire company to work more efficiently and securely

GoTo Resolve MDM makes it easy to manage the diverse mix of smartphones, tablets, and laptops used in today's modern workplaces. It has all the right features for effective Android, Apple, and Windows management in a single, easy-to-use platform that scales to your needs.

Empower your mobile workforce

Allow your employees to choose the devices they prefer to work with and support the growth of your company with faster device setups and a smoother device user experience.

Secure everything

Protect your company against financial and reputational risks by preventing human errors and keeping your devices and data safe.

- Cloud-based MDM/UEM solution
- For mobile devices and workstations
- For Android, iOS, macOS, Windows

Manage devices smarter

Keep your devices healthy and up to date with centralized and automated device management and improve work efficiency by decreasing the number of IT issues.

Efficient device management has never been easier.

Key benefits:

- Do more in less time with greater accuracy.
- Spend less time worrying about technical issues and focus on more essential things.
- Ensure smooth onboarding by pre-configuring devices with the right settings and apps.
- Allow your workforce to work with the devices that best support their productivity.

Key capabilities:

- View real-time device data and analytics
- Control and manage devices in one place
- Secure company data and assets
- Manage applications on devices
- Automate device setups

GoTo Resolve has everything you need for powerful Mobile Device Management.
Get started in minutes.
